UPDATE

It's been over 18 months since the merger of Marion Fluid Power (MFP) and Filtration Products Corp (FPC). We at the **Maradyne Fluid Power Group** are very pleased to announce that all shipping, delivery, inventory and communication delays are long resolved. We are operating at full speed, on all cylinders and ready for new business opportunities.

Our lead-times are now an industry best due to the large expansion of production in our Cleveland, Ohio facility with millions of dollars in inventory ready to ship!

Many of our customers have noticed significant price reductions on their invoices for current buys due to a company-wide overhaul of our pricing strategies. Our distributors have received >10% cost reductions with no price increases scheduled thru 2018. Our OEM customers should take this time to contact us at www.maradyne.com or call us a **800-537-7444** to review current pricing levels and or to schedule a meeting with a local representative from our new sales team.

As stated, inventory in Cleveland is plentiful with immediate shipment available for over 1700 parts and growing. We have also increased our product portfolio exponentially by adding the following new products:

- GEAR PUMPS
- DESICCANT AND AIR BREATHERS
- FLOW CONTROL VALVES
- PIPE CLAMPS
- SPECIALTY/PETROCHEMICAL AND EXTRA HIGH-PRESSURE VALVES
- HIGH AND LOW-PRESSURE BALL VALVES
- CUSTOM MADE TO PRINT HYDRAULIC RESERVOIRS
- OFF THE SHELF HYDRAULIC RESERVOIRS: 2,5,7,9,15,25,30,37 Gallon(s) available
- ADDITIONAL HYDRAULIC ACCESSORIES
- PRIVATE LABELING AVAILABLE ON ALL PRODUCTS

On behalf of Maradyne Fluid Power Group and the Maradyne Corporation, we thank you for your continued support as we look forward to meeting more of your needs in the future and exceeding your high expectations. Thank you.
